

# Civik Zink Domestic Spiral Staircase

COMPLETE  
**STAIR**  
SYSTEMS

The Civik Zink spiral is a secondary domestic off-the-shelf Kit staircase specifically designed for external usage. The standard kit has 12 pressed steel treads and a large triangular platform, vertical steel spindles and a black PVC handrail. The treads, centre column and spindles are galvanized for protection from the elements. Additional treads can be purchased to reach greater heights and riser bars are available to reduce the gap between the treads

HOT-DIP GALVANIZING

## CIVIK ZINK SPECIFICATION / OPTIONS

|                        |   |                                     |
|------------------------|---|-------------------------------------|
